PROFESSIONAL SUMMARY

Flutter Developer with a strong foundation in cross-platform mobile development, focused on building scalable, high-performance applications using Flutter and Dart. Proficient in RESTful API integration, Firebase services, and state management (BLoC, Provider, GetX). Experienced in applying Clean Architecture principles and integrating AI-powered features into mobile apps. Passionate about continuous learning, clean code, and delivering user-centric mobile solutions.

PROFESSIONAL EXPERIENCE

AI Integration Intern | Tips Hindawy

Jan 2026 – Feb 2026

- Gained hands-on experience working with Artificial Intelligence tools and applied AI concepts to real projects.
- Integrated AI features into mobile applications, supporting intelligent and adaptive user experiences.
- Worked with data processing and model interaction to implement AI-based functionalities.
- Collaborated with the development team to explore and apply AI solutions for real-world problems.

Flutter Developer Intern | Ideas and Concepts

Jun 2025 – Aug 2025

- Built and shipped a production field-merchandising app (Merchandiser App) deployed for use in Saudi Arabia, supporting merchandisers across store visits, task management, and reporting.
- Developed the app end-to-end using GetX for state management and routing, with a REST API layer integrating auth, markets, branches, tasks, products, RTV, and planogram modules.
- Implemented an attendance system, before/after ordering photo tasks, and inventory/availability checks, with full Arabic/English localization (easy_localization), light/dark themes, and a responsive UI (flutter_screenutil).
- Worked within a collaborative team, applying clean, scalable code practices throughout.

Gaming Developer Intern | Thaka International

Jul 2023 – Sep 2023

- Designed and developed 2D & 3D games using Unity and C#, covering core game mechanics, physics, and animations.
- Built a Maze Game in Unity with C# game logic and 3D assets modeled in Blender.
- Built and optimized game UI/UX, applying performance optimization techniques for smooth gameplay across target platforms.

PROJECTS

Health Rootz — Remote Health-Monitoring App (Graduation Project) | [Flutter](#), [Dart](#), [flutter_bloc](#), [dio](#), [Firebase](#), [REST API](#)

- Built the complete Flutter app with a multi-tenant architecture serving two separate experiences (Patient & Doctor) in a single codebase, with fully isolated state across 20+ Cubits.
- Engineered a centralized dio networking layer with interceptors for automatic JWT injection, a repository pattern for unified error handling, and global 401 logout/redirect handling.
- Implemented hardware-integration UX with countdown + polling-with-backoff for sensor readings, interactive fl_chart visualizations, a responsive layout (mobile/tablet/desktop), and full Arabic/English localization.

Merchandiser App — Field Merchandising App (Production, Saudi Arabia) | [Flutter](#), [Dart](#), [GetX](#), [REST API](#)

- Built and shipped a production app for field merchandisers covering store visits, task management, attendance, and reporting, deployed for use in Saudi Arabia.
- Developed the full app with GetX state management and a REST API layer, integrating auth, markets, branches, tasks, products, RTV, and planogram modules, with Arabic/English localization, light/dark themes, and a responsive UI.

Instagram Clone | [Flutter](#), [Dart](#), [Firebase \(Auth, Firestore, Storage, Messaging\)](#), [Cloudinary](#)

- Built a full-featured social media app with posts and image carousels, video reels, stories, an explore/search page, a follow system, likes, comments, and saved posts.

- Implemented real-time chat and used Firebase (Auth, Firestore, Cloud Messaging) with Cloudinary for media hosting; managed state with BLoC and Provider.

Real Estate App | *Flutter, Dart, Firebase*

- Built a property-listing app with search, filtering, and detailed property views, backed by Firebase for authentication and real-time listing data.

Language Learning & Translation App | *Flutter, Dart, Firebase*

- Developed a language-learning app featuring translation and interactive lessons, with Firebase handling user data and progress persistence.

Fitness App | *Flutter, Dart, Firebase*

- Built a fitness-tracking app with workout plans and progress tracking, using Firebase for authentication and user data persistence.

5-a-Side Fantasy Football App | *Flutter, Dart, Firebase*

- Developed a fantasy football app for 5-a-side matches with team selection and scoring, integrating Firebase for real-time data and user management.

Tic-Tac-Toe Game | *Flutter, Dart*

- Built an interactive Tic-Tac-Toe game with clean game-state logic and a responsive UI.

CERTIFICATIONS & COURSES

Mobile Application Development with Flutter | AMIT Learning, Nasr City *Jul 2024 – Nov 2024*

- Built cross-platform mobile applications using Flutter and Dart from fundamentals to advanced topics.
- Covered API integration, Firebase services, state management, and responsive UI design.

TECHNICAL SKILLS

Languages: Dart, Java, C++, C#

Mobile Development: Flutter, Cross-Platform Development, Responsive UI, Material & Cupertino Widgets

State Management: BLoC, Provider, GetX

Game Development: Unity, Blender 3D, C#, 2D & 3D Game Design

Backend & Databases: Firebase (Auth, Firestore, Storage, Cloud Messaging), Realtime Database, SQLite, Cloudinary, REST APIs

APIs & Networking: RESTful APIs, JSON Parsing, Error Handling, GetConnect, dio

Tools & Workflow: Git, GitHub, Postman, Agile/Scrum, easy_localization

Architecture & Concepts: Clean Architecture, OOP, UI/UX Principles, Performance Optimization, AI Integration

EDUCATION

B.Sc. Computer Science & Artificial Intelligence | Cairo Higher Institute

2022 – Jun 2026
